

Elgin Transfer Station

PROJECT OVERVIEW

Project:
*Elgin Transfer Station
Elgin, IL*

Client:
Waste Management, Inc.

Harbour Contractors, Inc. provided successful construction management services on the Waste Management Oak Brook Corporate Office, Stickney Vehicle Maintenance Facility, and several other WM Transfer Stations and was selected as the Construction Manager for the new Waste Management Transfer Station located in Elgin, IL. This project, as are most of WM projects, was a LEED certified building.

Harbour is no stranger to LEED accreditation and has even been instrumental in designing a "GREEN AIRPORT" accreditation system at the OMP project. This rating system is being looked at for the future civil projects to follow, when LEEDs does not apply, because the construction does not consist of a building that can be certified.

Work Included:

Survey & Layout
Underground Utilities
Storm System
Concrete and Asphalt Paving

Project Management & Cost Controls
Project Documentation
Value Engineering
Parking Structure
