

# Will County Adult Detention Facility

## PROJECT OVERVIEW

**Project:**

*Will County Adult Detention Facility  
Expansion*

**Client:**

*Public Building Commission of Will County,  
Illinois*

**Contract:**

*Construction Manager*

**Harbour Contractors, Inc.** had such success on the Kendall County Public Safety Complex in 1998 and then on the expansion of that facility in 2005, that when the neighboring Will County Adult Detention Facility needed to be expanded, they knew exactly who to call.

As a construction manager, Harbour began working with the architects during the design phase to accelerate the schedule and to give important input into the phasing process. The construction of this facility took place in several phases over a three year time period in order to allow the current population to remain within the facility. The project consisted of adding new general population pods, a new medical detention pod, off-site video visitation, expanded laundry services, a new sally port, and converted the existing sally port into an expanded / remodeled kitchen.

The project was completed on time and within budget. Upon completion of the 150,000 SF addition, the Will County ADF increased capacity from 330 inmates to room for nearly 1,100 inmates on the same site.
