

# South Lake Shore Drive Reconstruction

## PROJECT OVERVIEW

**Project:**  
*South Lake Shore Drive Reconstruction  
Jackson Park  
Chicago, IL*

**Client:**  
*Chicago Department of Transportation*

**Contract:**  
*Construction, Engineering, & Inspection  
Services*

**Harbour Contractors, Inc.** provided construction, engineering, and inspection services to the Chicago Department of Transportation for the reconstruction of South Lake Shore Drive from 57<sup>th</sup> Drive to 67<sup>th</sup> Street.

As transportation, recreation, and tourism have grown, so have traffic volumes. Heavy traffic and the seasonal weather contrasts led to a crumbling road.

The outlook for South Lake Shore Drive is brighter. More than 6 miles of the roadway – from 23rd to 67th Streets – were rebuilt.

The new section included new roadway, sewer & lighting installations as well as the addition of 5 new pedestrian underpasses, giving the lakefront easy pedestrian access from Jackson Park.

#### Services Provided Included:

Road & Bridge Engineering & Inspection  
Survey & Layout  
Material Inspection

Project Management & Cost Controls  
Project Documentation  
Site Planning & Public Agency Coordination
