Fred Barofsky
Tel: (708) 839-1800*

Construction Cost:

\$ 9 million

Contract:

Construction Manager

Completion:

1999

Harbour served as the Developer, Designer, and Construction manager for the Darien Sportsplex. This Multi-use sports facility houses two NHL regulation ice surfaces and two indoor field surfaces. It also includes a pro shop, concession stand, locker rooms and several meeting rooms for the facilities. In order to meet budget and usage requirements Harbour used a fast tracking process to have the ice arenas ready for the start of the hockey season.

The successful design of the Darien Sportsplex has truly become a foot print for athletic facilities throughout Chicago's suburbs and, has helped several youth organizations grow their programs, helping to keep the area's youth in shape and having fun.

Harbour is open to working with additional Public agencies to bring state-of-the-art facilities to their municipalities through public/privates ventures like this case.
