Harbour was selected to provide Construction Management services for the new Local 399 Union Hall and Training Center in Chicago, IL. Harbour is extremely proud to work for a union after many years of working alongside them throughout our many projects. The new 399 Training Hall features two large training areas for new and current members of Local 399 to sharpen their skills as Operating Engineers.

The Hall also features a wing with second floor offices for front office support staff of the Union, which supports their members on a daily basis. The project is wrapping up in 2008 and will help elevate the already high quality of service rendered by Local 399.
