

O'Hare Fire Rescue

PROJECT OVERVIEW

Project:

O'Hare Fire Rescue
Airport Fire Station
Chicago, Illinois

Client:

Chicago Department of Aviation
121 N. LaSalle St.
Chicago, Illinois, 60602
Dave Mosena, Director
Tel: (773) 949-2640

Construction Cost:

\$ 6.5 Million

Contract:

Construction Manager

Completion:

1998

Harbour was selected as the construction manager for the new O'Hare Fire Rescue Station. The new station had to be completed as soon as possible to help with the increased volume of air and road traffic for what had become the world's busiest airport, with the opening of the new terminal.

Harbour was able to implement both *value engineering* and *fast tracking* to deliver this facility as fast and as cost effective as possible while maintaining the excellent level of quality that the Harbour name has become synonymous with.

Services Provided Included:

Construction Engineering & Inspection
Survey & Layout
Material Inspection
Value Engineering

Project Management & Cost Controls
Project Documentation
Site Planning & Public Agency Coordination
Fast Tracking
