

## PROJECT OVERVIEW

**Project:**  
*O'Hare Modernization Program*

**Client:**  
*City of Chicago*

**Construction Cost:**  
*\$ 6.5 Billion*

**Completion:**  
*2005 - 2015*

## Highlights:

**Harbour** has been the Contractor of choice for the Chicago O'Hare International Airport since it was selected for the addition of International Terminal 5 in the late 1990's. Currently Harbour is serving as a Construction Manager for the \$6.5 Billion - O'Hare Modernization Program (OMP). The project consists of the realignment of the airport's runway configuration and the construction of additional runways to free the airport of the current cap limiting the number of flights per day.

The program also involves the relocation of a railroad along with the expansion of its current light rail system OATS. The final phase of the OMP project plans for the addition of a west terminal, ring road, and the completion of the Elgin-O'Hare Expressway.

## Services Provided Included:

Construction Engineering & Inspection  
Survey & Layout  
Material Inspection  
Demolition

Project Management & Cost Controls  
Project Documentation  
Site Planning & Public Agency Coordination  
Land Acquisition
