

Oak Brook Municipal Center

PROJECT OVERVIEW

Project:

*Oak Brook Municipal Complex
Fire and Police Facilities
Oak Brook, Illinois*

Client:

*Village of Oak Brook
1200 Oak Brook Rd.
Oak Brook, Illinois, 60523
Kevin Quinlin, Village President
Tel: (3630) 990-3000*

Construction Cost:

\$ 9 Million

Contract:

Construction Manager

Completion:

2007

Harbour was once again called into action when the Village of Oak Brook needed to expand the capacity of their Police and Fire Departments to match the growth of their community. This single site facility was designed to offer a more seamless approach toward community services for the residents of Oak Brook. This combined facility helped to unify the approach of public safety and saved the village roughly 40% in construction costs.

Adding to the challenge of construction of the multi-department municipal center, Harbour Contractors constructed the new facility while both the Fire Department and the Police Department remained operational and integrated into the new facility as the building was completed. Strategic planning allowed both departments to offer their high level of services 24 hours a day during the entire duration of the project.

Services Provided Included:

Construction Inspection
Survey & Layout
Material Inspection

Project Management & Cost Controls
Project Documentation
Site Planning & Public Agency Coordination
