

Lyondellbasell SIT – Morris, IL

PROJECT OVERVIEW

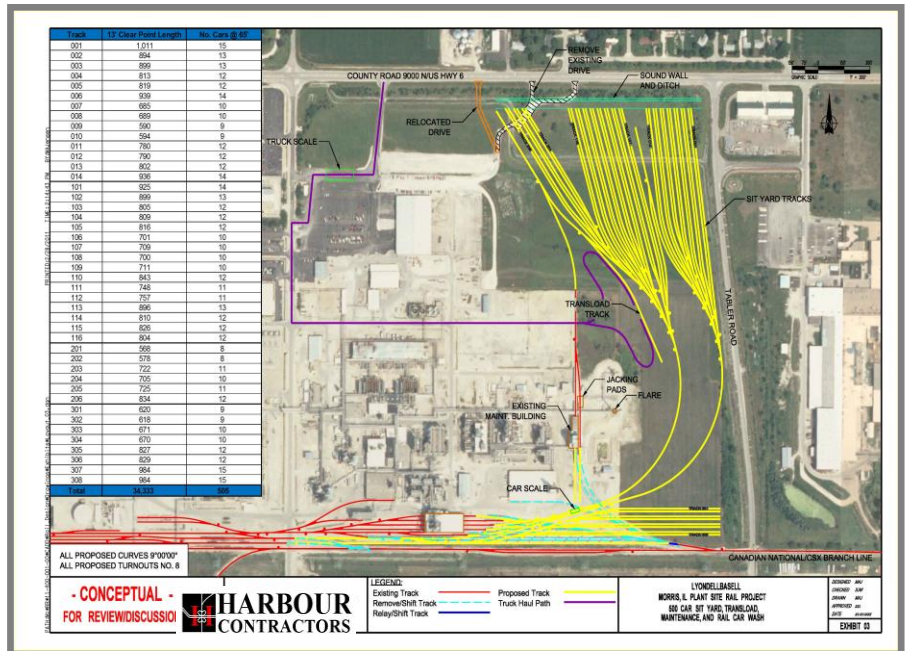

Project:
Lyondellbasell SIT Yard
Morris, IL

Client:
Lyondellbasell
Allen Richards
(281) 294-1196

Estimated Construction Cost:
\$ 22 Million

Contract:
Design Engineering & Construction
Management

Completion:
2013

Harbour Contractors, Inc. is currently designing and building a new SIT facility at Lyondellbasell's Morris Plastics Complex. This facility will provide an approximately 500 car storage capacity including over 55,000 tf of new track construction, reconstruction of existing loading tracks, new transload facility, new car maintenance building, and new car wash facility on a 40 acre site.

The site development includes underground drainage systems, relocation of existing drainage ditches, site utilities, sound wall construction and extension of security systems from within the existing plant. Additionally, a new concrete trans-load road and new contractors' entrance will be constructed during this project.

Our services include design engineering, geotechnical investigation, surveying, operations consulting, estimating, procurement management, and construction management.
