

# O'Hare Area Transit Systems

## PROJECT OVERVIEW

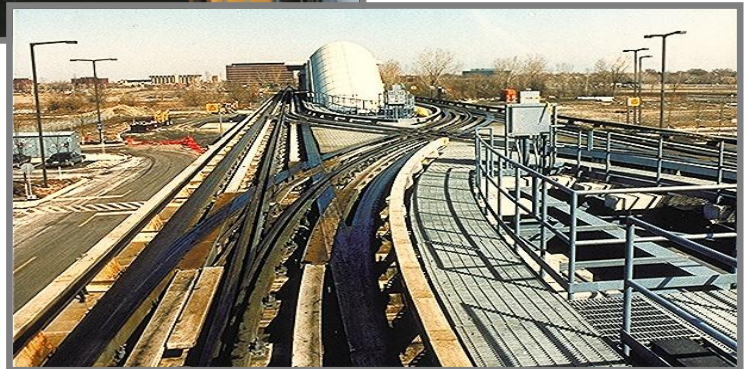

**Project:**  
*O'Hare Area Transit Systems  
(OATS)  
Chicago, IL*

**Client:**  
*OATS – A Harbour Division  
Raj Rambhajan  
(312) 617-4068*

**Construction Cost:**  
*\$ 125 Million Original Cost  
\$21 Million Annual Ongoing Maintenance*

**Contract:**  
*Construction Manager  
Operator*

**Completion:**  
*1995  
Operations and Maintenance Ongoing*

**Harbour Contractors Inc.** was hired by the City of Chicago to manage the construction completion of the elevated Airport Transit System. The system consisted of 2.7 miles of track and stops at five stations connecting passengers with Terminals 1 through 3 and International Terminal 5 and the remote long-term parking lots.

The 15-train cars are fully automated and operated from a remote operating and control facility. Besides the operation and movement of over 16-million passengers annually, OATS operates a 4-car, 16,000 SF maintenance garage in which they perform routine and overhaul maintenance.

**Work Included:**  
Track Work  
Earthwork  
Survey & Layout  
Underground Utilities

Project Management & Cost Controls  
Project Documentation  
Maintenance Building  
Operation and Maintenance  
Reverse Engineering
